

GRADUATE TRACKING PROJECT

INTRODUCTION

The Problem

According to the 2003-2007 UH System report, Kap'iolani Community College's performance indicator for standard 3P2, Student Retention in Employment was below the set standard rate (92%). Graduates from about half of our Career and Technical Education (CTE) programs were not staying in their jobs; therefore, programs failed to meet the standard rate for "retention in employment" noted above. Perkins IV reduced the number of core indicators that are required for postsecondary institutions. Thus, effective 2007-2008 the indicators have been renumbered. The new core indicator 4P1, covers this area of employment retention. Performance indicator, 4P1, defines student placement as "Student Placement in military service or apprenticeship programs, or placement or retention in employment, including placement in high skill, high wage, or high demand occupations or professions."

Several factors may contribute to the retention problem, including the lack of a systematic method for collecting reliable student placement, tracking, and employment retention data once students enter the workforce. Additionally, successful student placement and retention depends on the appropriate alignment of the college's programs with industry needs and students' workforce readiness.

The Study

To identify the reasons for the failure to meet employment retention standards, the college conducted a three-year project, The Graduate Tracking Project, with the support of Perkins funding. The study was divided into two distinct parts. The first was a continuous assessment of the employment placement and retention of graduates. We tracked students via post-graduation data. The second was the delivery of services to students, including provisions to adapt LRI's Workforce Readiness Program to CTE programs that fell below the retention standard. This report will focus on the procedure and result of the first activity: tracking graduates' employment and training satisfaction.

PURPOSE

The Graduate Tracking Project served two purposes: (1) develop an efficient graduate tracking process and (2) *begin* to identify possible causes for low retention rates.

DATA COLLECTION

The project developed and implemented surveys to gather data in three different areas: 1) success in finding employment; 2) job satisfaction; and 3) quality of training received at KCC.

As a first step, I, as coordinator, recruited and gathered a team of faculty and staff from the following departments: Office for Institutional Effectiveness (OIE), Center for Excellence in Learning, Teaching & Technology (CELTT), and Language, Linguistics & Literature (LLL). Next, before committing to a comprehensive approach, we decided to develop a pilot project that focused specifically on programs that performed below standard: Accounting, Culinary, Dental Assisting, Information Technology, Legal Education, Marketing, Medical Assisting, Physical Therapy Assistant, and Radiological Technology. Our first cohort of students was the spring 2008 CTE students.

With the collaborative efforts of the team members, three surveys were created: 1) Exit Survey (hard-copies distributed to graduates prior to their last class), 2) 6-Month Survey (distributed online after graduation) and 3) 12-Month Survey (distributed online after graduation). The online surveys were created using SurveyShare. The surveys went through multiple revisions and the final version can be found in appendices D1-D6.

Exit surveys were distributed during in-class sessions for most of the targeted CTE programs. Results of the exit survey are based on the number of graduates who completed the survey out of the total number of graduates in each class. The 6- and 12-month survey was conducted online through SurveyShare. Graduates were contacted through their email addresses. Email addresses were obtained through Banner and kept in our database where student information is stored. The results of the 6- and 12-month surveys were based on the number of students who completed the online survey out of the total number of students who were contacted through email. The line graph below displays the process and our response rate by percentages.

The increase of response rate from the 18% to 37% was due to hiring of a new staff member who was able to make follow-up phone calls and mail out surveys. Follow-up phone calls were made to students requesting their participation in the survey and to update their contact information. A mail-out of the 12-

month survey was distributed using their mailing addresses listed in the database. This full-time staff devoted approximately two-thirds of her time to this project.

The project was expanded to survey all CTE programs. Due to funding and time constraints, only exit surveys were distributed online (Using Opinio through the service of CELTT) for our Fall, 2009 cohort.

A database using FileMaker has been created and maintained with the assistance from CELTT to store the data collected from the surveys. An assessment blog/website has also been created with the guidance and leadership of English faculty member James Shimabukuro. This blog/website is a resource page for all faculty, staff, students and the community. The data collected from the surveys will eventually be posted on the site <http://askap.wordpress.com/>.

RESULTS

Through the surveys, a large amount of information was collected. With the assistance of our Office for Institutional Effectiveness and faculty James Shimabukuro, we were able to create a foundation for the analysis process. The data has been organized and a few generalizations were made. Data and graphs pertaining to each question in the survey are displayed in the appendices. The questions are separated into three different areas: 1) Success in finding employment; 2) Job satisfaction; and 3) Student's opinion of the quality of their training received.

Success in Finding Employment

Among all the respondents, approximately 92.5% of our Spring 2008 CTE graduates had jobs (full or part-time) between 6-12 months after graduation and approximately 73% of those graduates were employed in a field that is related to their certificate or degree (see appendices A3-A4). According to data reported in 2006-2007 from the UH System Office, the standard rate was at 92% (which is acceptable). KCC's actual retention in employment reported in 2006-2007 was at 90.55%. This concludes that in 2008-2009 we are slightly above the standard Perkins rate for retention in employment and there was an approximate 2% increase in our numbers of Spring 2008 CTE graduates being employed 6-12 months after graduation. The

primary reason for student's not being enrolled 12-months after graduation was because they returned to school (see appendix A8).

Job Satisfaction

Of all the questions we asked students in relation to their job satisfaction, we found that approximately 67% of our students were either "somewhat satisfied" or "neutral" when it came to their salary (see appendix B2). However, majority of the students (60%) thought that their current salary was as expected (see appendix B1). Overall, approximately 65% were satisfied with their jobs and not thinking of quitting (see appendix B4). The survey results show that the top reason that graduates are attracted to their employer is work schedule (see appendix B7). For those students thinking of quitting, the top three reasons were 1) Change of career interest (included finding a job in field of study, learning more or new things, and different experiences); 2) Moving elsewhere and 3) Returning to school (see appendices B5-B6).

Quality of Training Received

Of all the questions we asked students in relation to their training received at KCC, we found that above 80% of our students felt their training at KCC has prepared them to be flexible in working with supervisors, co-workers, and customer/clients in the following areas: 1) Teamwork; 2) Communication; 3) Responsibility; 4) Problem solving; and 5) Dealing with adversity (see appendix C3). Also, above 60% of our students rated the training they received at KCC "very good" or "excellent" in preparing them for the following: 1) Current employment position; 2) Positive professional relationships with supervisors in the workplace; and 3) Positive professional relationships with co-workers in the workplace (see appendix C2). Overall, most students commented positively regarding the training at KCC.

CONCLUSION & RECOMMENDATIONS

Being that this was a pilot project, further research is needed in this area of employment retention. Due to time constraints and funding, general conclusions were made and further analysis is needed to explain the results of the data. Given that a full cycle (6- and 12-months after graduation) of this project had to be

completed before any comparative analysis could occur, only a foundation of the analysis process was created. However, it gives us a starting point for gathering information.

If this project continues, I would recommend focusing on increasing response rates by offering incentives to survey participants and institutional support to provide assistance in survey follow-ups. Feedback from employers would also be beneficial. There was also a disparity between 6- and 12-month responses because of the increase in response rate. The 12-month response rate was higher due to the hiring of an assistant who conducted follow-up phone calls and mail-outs.

In order to better understand what happens to our students after they leave KCC, we need to continue tracking the satisfaction of our graduates, as well as improve our ways of gathering data and tracking our graduates. By utilizing the information gathered from graduates, improvements in curriculum and assessment can take place.

With a strategy in place the college will be able to reach Achieving the Dream Goal #5 (Increase the numbers of students, especially native Hawaiian, low-income and other under-served students who earn certificates or degrees). As a result of the development of improved data collection and tracking methods, the following strategic outcomes could also be achieved:

Outcome 2: Increase the educational capital of the state by increasing the participation and completion of students, particularly from underserved regions.

Outcome 3: Contribute to the state's economy and provide a solid return on its investment in higher education through research and training.

Outcome 4: Address critical workforce shortages and prepare students (undergraduate, graduate, and professional) to be leaders in a globally competitive economy.

Overall, this project is valuable to the college and its goals.

Question 7) What are the main duties of your current position?
Tutoring supplemental instruction in sciences
I provide paralegal assistance in working with clients of the Department of Health involving mental health patient cases who have been involuntarily committed until a court hearing is held to determine whether the patient is committable or stable enough to be released. Other duties include working with clients of the Department of Human Services involving child protective services petitions adoptions pretrial statements and adult guardianships etc.
Assess and treat patients according to treatment plan laid out by Physician and Physical Therapist. Also perform documentation and record keeping in relation to appropriate insurance coverages.
Answering phones filing charting
MLT
produce radiographic images for diagnostic purpose
Medical Assistant Back office duties Suture removal injections wound irrigation vitals etc...
performing radiographic procedures patient care supporting compliance and principles of responsibilities maintaining confidentiality showing ethics and integrity. work as a team with other staff members and independently.
Perform diagnostic examinations using ionizing radiation on specific areas of the body as indicated by ordering physicians assist radiologists during special procedures practice good patient care
Manual Therapy Therapeutic Exercises Modalities
outpatient physical therapy interventions
I have been working for the State Judiciary for the past 11 years. Am presently working for Family Court.
Data entry
treating students for minor illness and first aide as well as administering medication.
answer questions from callers in regard to their obtaining motor vehicle registration and/or driver's license clearance processing payments opening mail filing motions issuing clearances scheduling hearings processing written statements for submission to judges entering license suspension data.
Treating patients in there physical therapy needs.
Work Unit coordinator.
Help desk support Computer Networking Hardware and Software troubleshooting
everything from washing dishes to chopping vegetables to baking brownies. basically everything that can be done in a kitchen its my job to know what to do and how to do it
all Accounts payable duties journal entries
Technology liaison and office manager for a nonprofit that teaches writing and literature professional development skills to teachers. I developed and maintain a website do layout editing and deign for newsletters and teach technology as related to writing.
rehab
draft documents docket calendar file court docs
Office administration production
Treat patient according the Plan of Care from the Physical Therapist
I'm a liberal arts graduate. And I am currently enrolled at UHManoa majoring in Journalism. Please note that question no. 16 should not be a mandatory question since it may not relate to other people being surveyed. Thus response to this question may be skewed.
Interpret ASL/English for Deaf students in public school mainstream programs.
RN Nursing
Patient Care
sales associate
assisting the dentist
Out patient phsical therapy assisting
Taking X-ray writing prescriptions and assisting Orthopedic physicians
Daytime opener. Breakfast and lunch line cook. Checking in orders. Responsible for rotation and dishes in 3 deli cases. Quality and portion control. Customer service taking orders packaging take outs.
Administrative Assistant in a UH Department.
Legal Research and now I'm doing a case where I do a little of what Adjusters do calculate losses.
cashier/stock
Accounts Receivable
Clinical Assistant/ward clerk
Cake Decorator

Question 7) What are the main duties of your current position?
taking care of critically ill patients.
sales/marketing
The main duties are that I meet with the clients to go over their estate planning documents that we prepared for them and have them sign their final documents I notarize their documents and then all the regular office duties.
Implement Physical Therapist's plan of care to patients.
Provide paralegal assistance in working with clients of the Department of Health involving mental health patient cases who have been involuntarily committed until a court hearing is held to determine whether the patient is committable or stable enough to be released. Other duties include working with clients of the Department of Human Services involving child protective services petitions adoptions pretrial statements and adult guardianships etc.
Case management of terminally ill patients
Laboratory research work Gene sequencing
legal assistant/secretary to family law atty (this is a 2nd part time job(10-20hrs/week)
dealing with Japanese visitor. giving information for Japanese tourists. arrangement tour for them.
-explain radiological exams to patients and their family obtain consent -conduct radiological exams according to the facility protocols -tend to patients+families' needs -assist students in their clinical rotation
Nurse
Judiciary Clerk answering questions in regard to traffic violation citations driver license clearance and motor vehicle clearance.
I worked for the Judiciary prior to getting my degree. However it was my job that prompted me to get a degree in the legal field.
Educate and enforce Therapeutic excercises
sales associate
ass. producer main editor and graphic designer for Hawaiian Extreme sports TV and Ocean Paddler TV on OC16 and me and a felo student are the design consultants for Digipro
Cook. Prep. Line.
Journal entries process and enter invoices in the system print/cut checks
data systems development
Technology Liason webmaster
Assist project director to implement assess and improve programs for professional development of writing and literacy Database management web development technology lecturer
arranging fruits and vegetables
Cooking for the residents in Avalon Health Care
Install move and troubleshoot end user's issues with PCs hardware printer servers and software. Help desk and technical support.
cut checks and journal entry
Administrative
Design implement and assess the treatment plans of various injuries that our patients come in with.
Perform skilled physical therapy services to the patients at the nursing facility such as mobility training strengthening gait training and so forth so they may safely return home.
Non-profit startup and Art Sales
marketing of products and the company.
Creation of general 3D assessts: modeling texturing animation lighting rendering compositing
Clinical Medical Assisting-Vitals medical procedures assisting physician

Assist the PT with patients
RN - caring for my patients
Assisting patients with daily living.CNA
Accounts Receivable
administering medication and treatments applying my nursing skills to take care of 50 residents in a care home
cooking
Perform radiographic procedures
Cake icer decorator and mixer
I am employed with DOE as a School Based Paraprofessional in a fully self-contained classroom of students with special needs including those with hard of hearing disabilities.
Administration
Patient care
Assist the Dentist in procedures break down set up sterilize instruments
Assists in assessment of patients problems/needs and in developing implementing and evaluating plan of care. Assists in admission and participates in discharge planning of patients. Carries out restorative and rehabilitative programs for patients as directed by care plan. Instructs patients in self-care to promote independence. Involves patients significant others in patients' care. Assists with patients' ADL care (e.g. oral hygiene skill and nail care). Uses such equipment as foley catheters tracheotomy tubes nasogastric tubes oxygen and suction equipments etc.). Makes rounds with physicians and assists them in draping and gowning patients for various examinations or procedures. Applies compresses (hot or cold) as prescribed. Observes patients for reaction to drugs and/or treatment or any unusual condition and report to charge nurse. Answers patients call signals. Directs and assists in post-mortem care. Checks emergency cart. Counts and signs for controlled drugs. Receives transcribes and carries out physicians orders: Administers po IV SUBQ IM medications as ordered; performs treatments which do not require direct supervision of RN (e.g. dressings douches enemas irrigations alcohol rubs). Documents care/treatment rendered (per handwriting or computer) as required. Gives and receives intershift reports. Answers phone inquiries. Assists in orientation of newly hired or agency nursing personnel. Attends required in-service programs. On regular sustained basis cooperates with other staff members both within and outside department in accomplishment of own job duties as well as assisting others in accomplishing theirs; Serves as team player and role model for other employees in Organization always exhibiting traits of courtesy caring helpfulness and respect; conducts oneself in service-oriented manner that is attentive pleasant cooperative sensitive respectful and kind when dealing with members visitors public and all employees.

Question 26) If you could make one change in the program from which you graduated what would it be?
More communication between UH system schools in regards to transfer of credits classes to ease transfer from KCC to UH Manoa.
none
More hands on work
Nothing. I actually learned a lot. It was a great experience and I am currently taking pre-reqs for nursing.
Most of the equipment is old and breaks often and that cannot be helped because it is expensive to upkeep the machines when they break and the cost to replace them is expensive.
The only thing I would change would be the x-ray machines we use for lab classes and demonstrations. They're really old and should be replaced soon.
Longer time during internships especially with the acute and long term care settings.
Not only tell students the doctors can be mean but also the other assistants.
I would think if a student has already had experience and is still working as a paralegal in a law firm he/she should be credited with some internship hours say a number of hours for each year of experience so that he/she does not need to perform so many internship hours as required. It should be noted that it's difficult for a full-time paralegal to perform the required internship hours. In my case the reason that I attended this program is that I wanted to learn and obtain a degree. I have no intention of applying to work as a paralegal any more because I am old and I don't want to work under stress any more.
More clinical experiences.
It would be nice if the classes were more geared towards getting certifications.
Make more classes
I cannot think of any
No changes
Learning an actual marketing skill better such as managing a Database.
I can't think of any thing at this moment
Overhaul the Deaf and Interpreter mentorship program.
Allow each semester to have their own pinning ceremony.
Emphasize more on dental materials- products
Make it a 4 year program.
n/a
doing more mock dental assisting
The instructors are good but some of the clinical settings could be better. Some CIs lack basic social skills.
Because some classes are only offered during the PM during certain semesters it drags out the program. Wastes time.
In the COOP Program to give more training in a specific area with attorneys such as prepare different types of Memorandums. I give the attorney my legal research and how he prepares it in his arguments would be very helpful at this time. I will need to ask Mr. Chu to help me on how he prepares it in his Real Estate practice.
The instructors in the first semester of Nursing School seem to be out of touch with the current nursing environment. I would encourage the program to recruit nursing instructors that have recently worked in the hospital environment.
More opportunities for the pastry program

Question 26) If you could make one change in the program from which you graduated what would it be?
availability of classes offered for requirements of degree. Ex. There were only certain classes available certain semesters.
none...
add advanced classes for those that have been in the field for sometime and need the more advanced classes.
More text books material or case study test questions that that will prepare students for the national board exam.
Allow to ask questions during classes and promote critical thinking rather than memorize whatever the instructors tell us. For 2 years I kept on telling myself 'this is a vocational school not a college. Do not ask 'why' questions. Do not ask ANY question.'
Hands-on application of sciences in real-life situations especially in areas/job that are growing in Hawaii. For example in-vitro fertilization work civil engineering marine sciences etc.
Keep the internship requirement however the class time required for that was a complete waste of time.
reduce the favoritism
If a student has had already work experience of the same major less internship hours would be justifiable.
Make at least one or two student shifts for graveyard hours to better experience emergency situations
incorporate aqua therapy
more Audio Video Classes
Better kitchens and equipment.
none
Eliminate COBOL as required
No changes
Nothing else to change in my honest opinion
Certain classes that can gear and ready you for certain certifications would be great. For example toward the end of the class semester you would be certification test ready and encouraged to take the test before the semester is over. In other words by the time the class semester is over you would be A+ Microsoft etc. Certified. Maybe it is like that and I wasn't paying attention. Sorry if thats the case.
None that I can think of at this time.
Longer clinical hours and having more instructors teach the courses who are specialists in that specific field.
Have marketing credits transfer to UH.
i would create some classes that were more project oriented. something that the students can actually continue after school. i helped with the choosing of the book in the entry level class for marketing.
none
More hands-on experience less lecture
Longer clinical internships
Cant think of anything
I would like to see more specialty classes like C++ offered once in a while to students and graduates. I would like to see more certificate programs too. As a part time student I preferred classes in the morning vs. afternoon and evenings because of my work schedule.
Have a lesson on blood draws or how to start an IV on real people
More extra curricular programs in the culinary department.

The performance test and final paper.
instructors need to motivate the students interest
Being a distant learner student I hoped and wished that more classes were offered here on the Big Island where we can actually sit with an Instructor that is physically there. Learning through HITS(video conference) and on-line courses is quite a challenge. If I weren't determined to finish up the program I would've decided to quit because it takes strong focusing and willingness in order to educate oneself in this particular fashion.
Remove May Kealoha from her position and replace her with someone who is dedicated to ensuring that students are treated fairly and receive adequate training.
I would strongly advocate setting up a program that would help nursing graduates find jobs while still in the ADN program.
More clinical rotations.
Include an interview as part of the admission process to the nursing program!
n/a
None
nothing well taught
More clinical hours to gain experience. I also felt KCC nursing program was too political. Instructors had tendencies to play favorites among the students and noticed that some students that instructors were not fond of were given a hard time and sometimes failed.
I would have included a few more classes about Deaf education and teaching skills.
help students find employers who want an educated individual who is will to pay a proper wage because I found that most culinary places her in Hawaii now a days want someone without education so they can pay them less.

Question 20) What are your comments on Question 19?
I feel that the training our class recieved was very good for the job that I am in right now. Much of what goes on in clinical practice is also learned through on the job experience and our instructors made it a point to assure us of the many variables that we will come to face once in these situations.
The program is very well put together from the very start you are thrown into several radiology departments which shows you the different aspects of each clinic. Books can only do so much and learning hands on is irreplaceable.
I think KCC did an excellent job preparing me for the career I have today. Not only were positive relationships between supervisors and co-workers stressed but important skills knowledge were also taught during the program.
The program has prepared me for this career path.
I don't work in a related profession anymore but when I did I had some problems with immature co-workers which is part of the reason I stopped working there.
I have already had legal working experience prior to attending KCC because I have more than ten years of experience working as a paralegal in immigration field. Therefore the training received at KCC does not prepare me for anything.
I feel that I would have benefited from the training at KCC if I were working in the field while I was taking IT classes.
Was well prepared for the job from what i had learned from school
Paralegal involve things like research writing interviewing and investigation that can help in a wide variety of careers
The nursing program prepared me for the job I have today.
n/a
I've had experience before prior to going to KCC so going into that professional I knew what to expect
No comments.
The working knowledge in legal documentation and legal writing has assisted me in improving my work skills in the work place.
I like working with other people in the law field especially an Attorney like Mr. Chu he is excellent and gives me guidance.
I enjoyed the professor's that are a part of the Accounting program at KCC

Question 20) What are your comments on Question 19?
I feel that KCC did not prepare me for my field of practice only because KCC does not have a semester that includes nursing for critical care.
team work is a critical part of working effectively.
The classes are pretty good when you are taking all the different classes but trying to find more advanced classes without going to law school is -0- and it is hard to grow and learn more without advanced classes. I have gone to all of the estate planning real property etc. and they are all basic!!
I work for the State of Hawaii. As with any working place there are people in positions that they are not qualified for or they work minimally and complain all the time about their work. We are in for a work furlough.
KCC nursing program rather damaging to my trust to other people in my profession. It took awhile before I re-learned to be comfortable with other professionals.
Overall my education at KCC did not prepare me greatly. However one class Biol 275 taught by Dr. Berestecky greatly prepared me for actual research work in a laboratory moreso than any other science or laboratory class taken at KCC.
I am not currently employed
There should be a n/a
I have already had plenty working experience and relationships with co-workers prior to taking education and training at KCC. I have also had experience of being a paralegal which is my major at KCC. I just wanted to attain a degree.
KCC PTA staff did a great job teaching their students about professionalism and the technical aspect of it
It started me the right way
Overall good experience. All my instructors/chefs were super knowledgeable. My only problem was the facilities and budget for upkeep.
Instructors and supervisors have a big difference
COBOL is a waste of time.
Legal Education greatly improved my writing research interviewing investigation and logic skills
I didn't regret taking this course in K.C.C all the hard work were paid off
I have been working in a corporate environment since high school so it was hard for me to relate and rate the last 2 statements.
no
i felt that kcc was good in the beginning but it became repetitive with the marketing classes. it seemed like we ended up doing the same things in the end of each class.
excellent teachers
Although I am not an IT person in this company I am using my skills learned to help design the policies and procedures of our new computer program. The non IT classes such as e-commerce and interpersonal communication classes has extremely help me understand and coop with fellow workers.
none
KCC prepared me very well for my current position. The skill level I received from KCC is as good or lots of times better then my co-workers.
I am able to utilize my training and skills learned at my current employment and it makes me proud to be recognized for my knowledge in ASL.
Since I graduated from the ADN nursing program in May 2008 I have not been able to find a nursing job. For this reason I wasn't able to fully answer question #19.
Much Mahalo to all Nursing Instructors at KCC for their patience hardwork and devotion to their students.
the rad tech program prepares you to handle yourself professionally
no comment
N/A
rad tech program was excellent preparation

KCC nursing program needs to emphasize more training with communication with MDs and nurses not just procedures and paperwork. Too much emphasis on paperwork that isn't used very useful in the field.
Though I am not currently in the field of interpreting the Educational Interpreting program at KCC taught me a great deal about general professional behavior and work-related skills.
hard to answer 'current employment position' based on a position that has nothing to do with my studies in culinary at kcc so I compared it to my general studies.
Receiving the training in KCC was especially good for me because thats how I met my employer. So that I was able to get to know him better.
Wish I could find a job in what I graduated in.
The pastry program is a broad overview of skills necessary, but extra classes in cake decorating, Bread, and candies/chocolate would have helped.
KCC provides many resources that are important in the development of my paralegal career, i.e., seminars, jobs, organizations, good instructors who are practicing lawyers.
19a. I am using the skills that I learned at KCC. 19b. I learned this at my hospitality class. So it's very useful. 19c. I learned this at my hospitality class too.
None
I feel that my training at KCC helped me a lot at work because if I'm ask to do something, at least I have an idea of how it is done & know what it is suppose to look like.
19c We did a lot of team projects which I believe help to build good relationships with our peers.
The program provides a foundation & comprehensive overview of many facets in legal environment. Since the instructors are also lawyers, students are able to get a feel for the personalities they could encounter. I'd say that the program is rigorous - very good. School rarely prepares you for what one will actually be doing - but trains you to persevere
I had fun going to school and learning from our instructors. Great training but also you must study hard as well.
19a. Current employment has nothing to do with training received @ KCC.
Learning how to interact w/ various ppls is a key component to any job. The skills acquired from take the Nurse Aide course truly makes a difference in whatever area in life/job obtained.
My ability to work with other people has more to do with my work experience than it does with training rec'd at KCC.

#27 What else do you wish you had learned/studied during your time at Kapi'olani Community College to prepare you for your current job?

Question 27) What else do you wish you had learned/studied during your time at Kapi'olani Community College to prepare you for your current job?
Topics in my field: Involuntary Commitments Child Protective Services
Prepare us in Administration skills a lot better. We mostly focused on clinicals. Since we had advance clinicals we should also have advance administration.
I wish I had known my muscular anatomy a little better.
Include hands on teachings on joint mobilization in the lesson plan.
More in depth neuro program
Would like to get a BA but can't afford it.
Nothing
Refer to my answer to 26.
I wish I had studied more about networking. Database and web would have been nice too.
More Microsoft Office classes
I think I'm very well prepared for my current and/or other jobs.
Taxes estate planning TRUSTS
More computer programs
Documentation on Patient's chart
More experience/exposure to deaf children less with adults.
Nothing
would have taken more course that were not related to my major
I think it pretty much cover everything needed to know
The course left me fairly well prepared. Better documentation practice.
Patisserie
I had a legal writing class maybe I should take more advance classes but again time and money. I don't make enough at this time.

Question 27) What else do you wish you had learned/studied during your time at Kapi'olani Community College to prepare you for your current job?
nothing
None.
More critical thinking and problem-solving based learning related to the sciences. Especially in areas that pertain to major problems faced by Hawaii and globally such as climate change.
More indepth neuro
Nothing
I would like to continue and get a bachelor's degree.
maybe learn more about pharmaceutical drugs that we may encounter in the field
How much should I charge for my skills?
Want to go back for baking and garde.
none
Since I work in this company for the past 15 yrs I learned a lot of things. In fact by the time I registered at K.C.C I consider myself as mentally and physically prepared on any challenges I might encounter inside or outside the classroom.
I wish I had studied more about business.
Nothing that I can think of at this time.
Job searching process interview/resume advising and post-grad transition to job environment.
Computer programs web design
more hands on experience. i learned the same amount that i learned in the how many years at kcc at the business plan competition seminar at the UH competition.
I wish I could have continued my education to acquire a business degree too but my work did not allow me more time.
Same as question 26
Languages (Spanish)
to learn the history of food and food science
Maybe if there were more Education courses I would have loved to have enrolled in them. Although the Ed classes that I have completed were sufficient at the time I feel that we can always explore new and updated methods as education continuously changes.
Having classes through the summer prevented us from taking advantage of summer student internship programs which could have helped more of us to secure employment after graduation. Many of the nursing students who graduated in 2007 and 2008 have not found nursing jobs in Hawaii.
More specialized fields of nursing (i.e. hemodialysis oncology telemetry/critical care)
More clinical rotations.
N/A
n/a
I believe mixology would have been good for my job preparation.
ive learned all that i need to in the program
Just to clarify I graduated from the Educational Interpreters and Assistants department with an AS in Educational Interpreting. That program wasn't on your list.
how to deal with employers who dont have good ethics.

SURVEY TEMPLATE

Dear Kapi'olani Community College Graduate,

This survey will collect information on your post graduate professional activities and your perceptions of the training that you received at Kapi'olani Community College. The information will help us to evaluate the effectiveness of our career and technical education programs. Please take a few minutes to complete and return this survey in the self-addressed, pre-paid envelope. Your responses and comments will help us meet accreditation requirements and provide invaluable information on how to improve our program(s). Your personal information will be kept confidential and will not be shared. Your contact information will allow us to keep in touch with you for possible future assessments.

Thank you,
Kay K. Gushiken
CTE Project Coordinator
